INTRODUCTION

I'm an architect specializing in Interior and Exterior design, I have the expertise to bring your dream space to life.

This interior design incorporates the elegance of French style with a palette of soft and light colors such as baby Green, Beige and off white. along with the touch of wood, creates a beautiful and serene atmosphere. Adding flowers definitely will bring more life to the place.

This café and bakery feature stylish gray chairs paired with light brown wooden furnishings. I used the Glass for Elevation of the space, allowing an abundance of natural sunlight to flood in. This design was carefully curated to provide an inspiring and energizing atmosphere for those seeking a place to work or relax, ensuring that our patrons can enjoy the beauty of the outdoors while staying motivated indoors.

This restaurant is beautifully designed using natural materials like stone and iron fixtures, with touches of greenery. It aims to showcase the rich culinary heritage of Iraq, and features large tables for a comfortable family-friendly atmosphere. In the ceiling i used the (visible ceiling) to give a nice view to the space and also maintenance will be easier to do.

The design of this space combines modern and classic elements, with a focus on creating a luxurious and opulent atmosphere. The predominant colors used are white, grey and gold, which add a touch of elegance. One of the standout features is the ceiling, which is adorned with a special type of fabric that gives the space a sense of flexibility and movement, the concept of the ceiling is taken from brides dresses. Overall, the design aims to create a regal and lavish ambiance.

MODERN and BOHO

I designed this room for a young boy, aiming to blend modern and boho styles to achieve a cozy ambiance for relaxation. Since the room will also be used for studying, we incorporated wooden elements to provide a comfortable study space.

I designed this house to be simple and modern, using straight lines and 90-degree angles in the plan. The room structures reflect our Kurdish traditions, with distinct spaces such as a living room separate from the guest room. For the exterior, we adopted a modern classic style, incorporating a mix of modern horizontal and vertical lines. A prominent arch in the middle of the house adds a vintage and classic touch, with intricate carvings to enhance its details.

The Modern Classic style primarily features neutrals, punctuated by occasional pops of color and simple patterns such as stripes, vintage motifs, or solids. The neutrals in Modern Classic homes strike a harmonious balance between warm and cool shades. Additionally, we incorporated green, as it's considered the most relaxing color, symbolizing the power of nature and life. This choice is particularly apt considering they'll be doing their nails, a process which takes time. The use of clean and simple lines showcases special vintage furniture and decor. When selecting furnishings, opt for pieces that exude softness, comfort, and a casual vibe. The best part about the Modern Classic style is that it doesn't require a hefty budget to achieve this look.

In this interior design, I emphasized two key elements. First, the logo, which represents beauty. I enlarged the logo and placed it on a prominent gray porcelain frame to enhance its visibility. Second, we displayed the doctor's certificates prominently to instill trust in visitors.

Additionally, we added modern shelves design on both sides of the room for personal product placement. I incorporated various shades of neutral colors to create a calming effect.

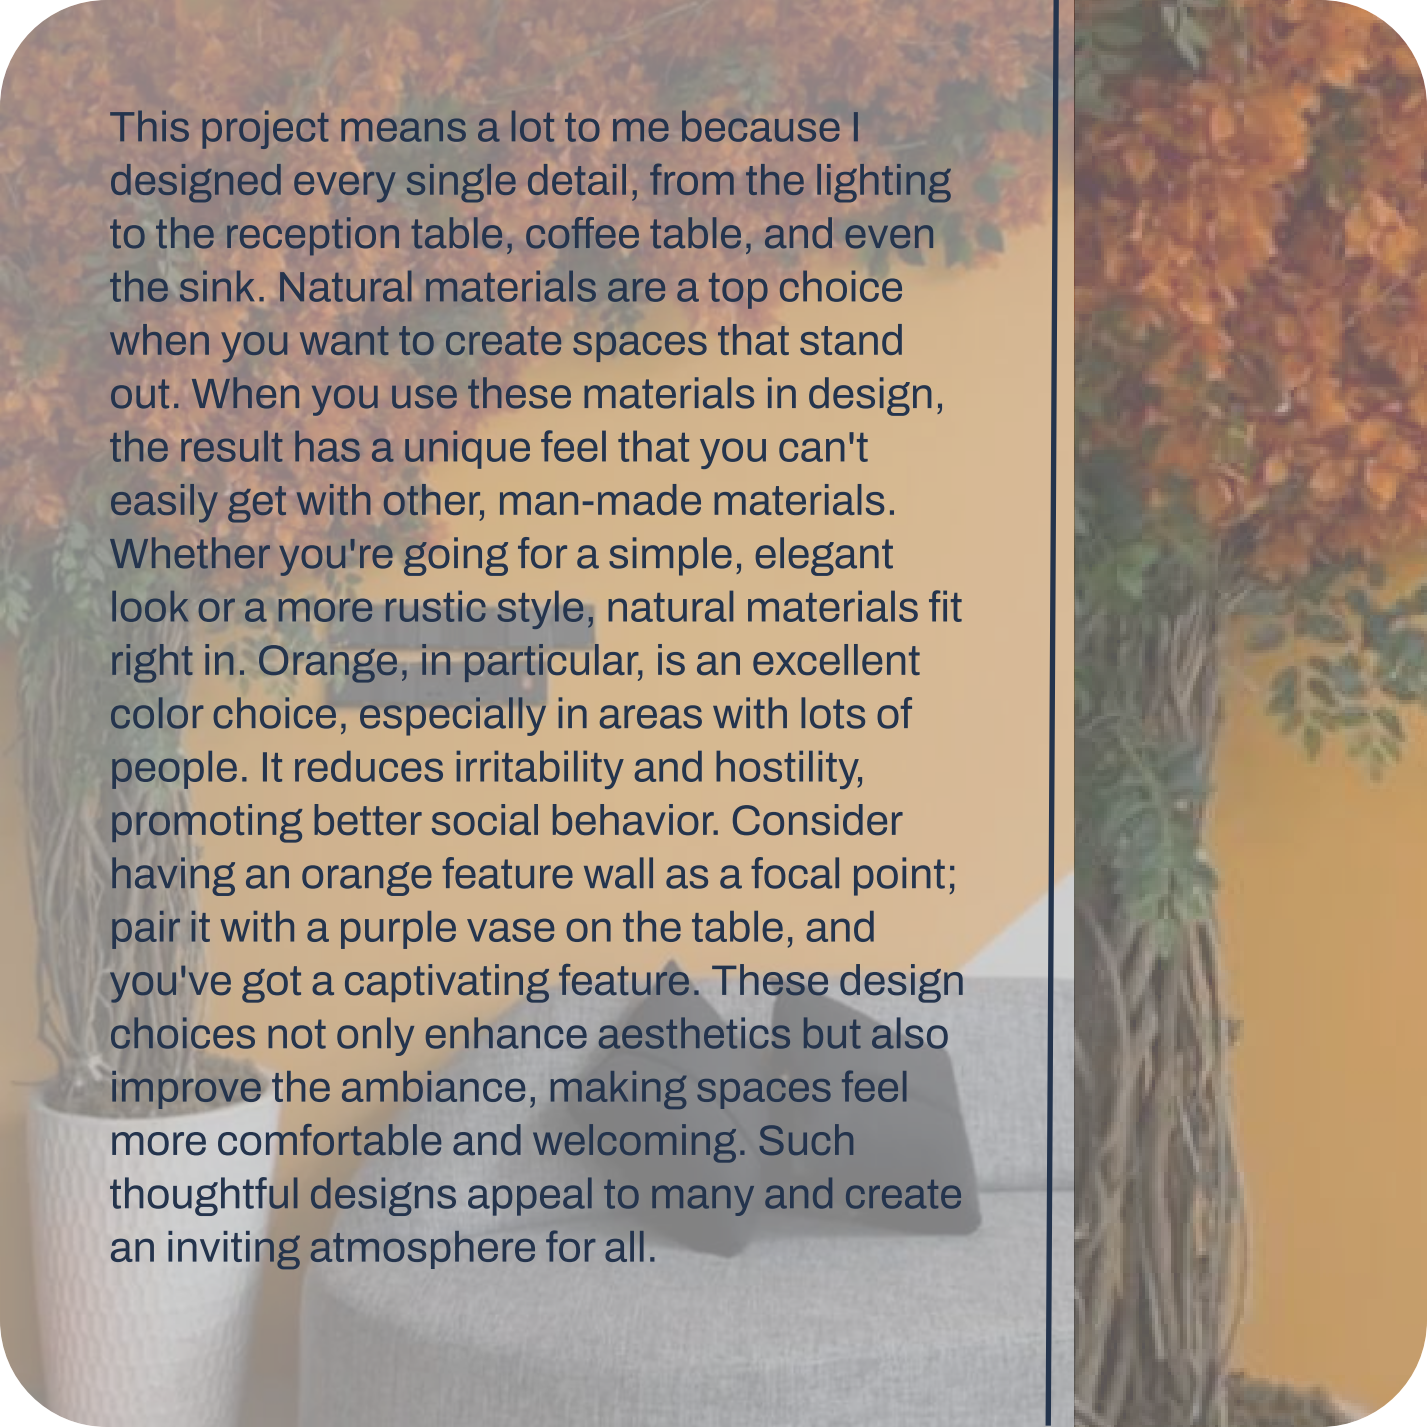

This project means a lot to me because I designed every single detail, from the lighting to the reception table, coffee table, and even the sink. Natural materials are a top choice when you want to create spaces that stand out. When you use these materials in design, the result has a unique feel that you can't easily get with other, man-made materials. Whether you're going for a simple, elegant look or a more rustic style, natural materials fit right in. Orange, in particular, is an excellent color choice, especially in areas with lots of people. It reduces irritability and hostility, promoting better social behavior. Consider having an orange feature wall as a focal point; pair it with a purple vase on the table, and you've got a captivating feature. These design choices not only enhance aesthetics but also improve the ambiance, making spaces feel more comfortable and welcoming. Such thoughtful designs appeal to many and create an inviting atmosphere for all.

Modern kitchen design serves as a serene backdrop to the bustling activity within. A modern kitchen typically boasts open spaces, emphasizes functionality, minimalist features, and employs a simple color palette, offering a clutter-free area to relax and entertain. Modern kitchens are often open-concept, with tall ceilings, expansive countertops, and ingenious storage solutions that hide any clutter. They also showcase materials in a way that makes them look their best when bathed in natural lighting. A distinct feature is the gray wall behind the sofa, crafted to resemble a piece of art. This wall not only enhances the comfort of the space but also adds an artistic and beautiful touch to the kitchen's look. Last the kitchen furniture plays a significant role in the overall modern design. a curved sofa provide more comfort than traditional pieces, lending a contemporary look to the kitchen.

Eco-Living Domes

are nature's perfect structure offering a unique alternative housing environment. geodesic dome closely mimicked natural design akin to a spider's web, which can survive a hurricane because of its high strength-to-weight ratio. In our city, I've observed an increasing trend of people constructing farmhouse retreats in villages due to the scarcity of enjoyable urban spaces. Unfortunately, this trend has had adverse effects on the natural landscape and mountain views. In response, I've drawn inspiration from the visionary R. Buckminster Fuller, who dedicated his life to creating solutions that benefit all of humanity.

As a result, I've designed these eco domes as a sustainable and harmonious solution, combining the genius of Fuller's ideas with the beauty of our natural surroundings.

Curved designs possess an enduring charm, bringing about a captivating visual allure. They infuse spaces with intrigue and a seamless, flowing sense of harmony. Moreover, curved furniture has the remarkable capacity to reshape the spatial dynamics of an environment, introducing a sense of fluidity and softness into a world frequently dominated by rigid, linear forms.

Considering the client's desire for a comfortable and relaxing space, I've deliberately incorporated curved furniture in light, soothing colors to achieve this desired ambiance.

The design of this space combines modern and classic elements, with a focus on creating a luxurious and opulent atmosphere. The predominant colors used are white and gold, which add a touch of elegance. One of the standout features is the ceiling, which is adorned with a special type of fabric that gives the space a sense of flexibility and movement, the concept of the ceiling is taken from brides dresses. I used maroon color as a simple touch to add warmth to space and also to work as accent color. Overall, the design aims to create a regal and lavish ambiance.

The Interior and Exterior of the coffeehouse

Just between us, this is my very first design project since graduating. The core idea for this coffeehouse is to make customers feel as if they're right at home, creating a cozy and welcoming atmosphere. It's like having a second home where people can relax and enjoy their coffee. To achieve this, I've incorporated elements like comfortable chairs, calming colors, soothing music, and wooden accents to encourage customers to stay a while. I've also added unique touches to different corners of the coffeehouse, giving customers multiple options for their enjoyment.

THANKS

I hope you enjoyed my world
of Design.
